

CALL FOR PAPERS

ICCIEA 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCIEA 2021 : International Conference on Computational Intelligence and Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Intelligence and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Neural Networks	Neuroinformatics and bioinformatics
Computational neuroscience	Support vector machines and kernel methods
Connectionist theory and cognitive science	Data mining
Mathematical modeling of neural systems	Pattern recognition
Neurodynamic analysis	Time series analysis
Associative memories	Image and signal processing
Neurodynamic optimization and adaptive dynamic programming	Robotic and control applications
Embedded neural systems	Telecommunications
Probabilistic and information-theoretic methods	Transportation systems
Hybrid intelligent systems	Intrusion detection and fault diagnosis
Supervised, unsupervised and reinforcement learning	Hardware implementation
Brain Imaging and neural information processing	Fuzzy Systems
Brain computer interface
