

CALL FOR PAPERS

ICCSSCE 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSSCE 2021 : International Conference on Classification of Surveys and Surveying Methods in Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Classification of Surveys and Surveying Methods in Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Surveying in civil engineering	Terrestrial or ground
Surveying principles and methods	photogrammetry
Principles of surveying	Aerial photogrammetry
Primary types of surveying	Hydrographic surveying
Building surveying	Errors in surveying and levelling
Defect analysis	Instrumental errors
Construction engineering	Collimation error
management	Error due to curvature and
Property development	refraction
Quantity surveying	Other errors
Photographic surveying	Maintenance of surveying equipment
