

CALL FOR PAPERS

ICDSMS 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSMS 2021 : International Conference on Design and Simulation of Mechatronic Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Design and Simulation of Mechatronic Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechatronics systems design
Mechatronic approach to system design
Simulation of mechatronics systems
Modularization and hierarchization
Design cycle at micro and macro level

Model-based system design
Linear motor design and drive methods
Force control and bilateral teleoperation
Multi-disciplinary design
optimization of complex mechatronic systems
Automated design and fabrication of complex systems
