

CALL FOR PAPERS

ICEEE 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEE 2021 : International Conference on Electronics and Electrical Energy is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electronics and Electrical Energy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electronics	Electrical energy conversion
Electrical energy	Electrical energy consumption test
Electric potential energy or kinetic energy	Alternating current electrical active energy
Electrical energy conversion	Alternating current electrical reactive energy
Electrical energy production	Electric utilities
Process of generating electrical energy from other forms of energy	Pumped-storage methods
Production and conversion of electrical energy	Electric power industry
Electric power utility	Electromechanical generators
Electrical energy management	Electric charges
Electric energy and current test	Measurement of alternating current electrical energy
Electric current and electric potential	Passive sign convention
Electricity generation	Resistive circuits
Electrical energy meters	Alternating current
