

# CALL FOR PAPERS

**ICERM 2021**  
**Apr 29-30, 2021**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICERM 2021 : International Conference on Ecological Restoration Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecological Restoration Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ecological restoration  
Ecosystem restoration and management  
Theoretical foundations of restoration ecology  
Revegetation and regeneration  
Planting methods  
Nursery techniques  
Soil and water conservation

Population genetics  
Applications of restoration ecology  
Soil heterogeneity effects  
Invasion and restoration  
Sourcing material for restoration  
Restoration ecology and conservation biology
