

CALL FOR PAPERS

ICFRCCCEA 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFRCCCEA 2021 : International Conference on Fiber Reinforced Concrete for Civil Engineering Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Fiber Reinforced Concrete for Civil Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Preparation technology and basic properties
Properties and modeling
Durability and sustainability
Fiber reinforced cementitious composites
Fiber reinforced high performance and ultra-high performance concrete
Admixtures for fiber reinforced concrete
Testing methods and standardization in civil engineering

Structural performance and modeling
Fresh properties and constructability
Testing methods and standardization in civil engineering
Fracture properties and flexural toughness
Shrinkage and creep
Field applications
