

CALL FOR PAPERS

ICGEDNA 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEDNA 2021 : International Conference on Genetic Engineering and DNA is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Genetic Engineering and DNA. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genetic engineering	Biomarkers and molecular markers
Genetic modification	Pharmacogenomics and personalized medicine
Molecular docking and computational evolutionary biology	Clinical genomics
Applications of genomics	Micro RNA
Genome analysis	mRNA analysis
Genetic engineering techniques	Bioinformatics in genomics
Machine learning in molecular systems biology	Comparative genomics
Current challenges in modeling cellular metabolism	Plant genomics
Plant biotechnology, plant genetics and its developments	Genome engineering
Cancer genomics	Microbial genomics
Functional genomics	Genome medicine
Next generation sequencing
