

CALL FOR PAPERS

ICGMEEA 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMEEA 2021 : International Conference on Geophysical Methods for Engineering and Environmental Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geophysical Methods for Engineering and Environmental Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geophysical methods for
environmental studies
Subsoil for environmental
investigations
Hydrological and hydrogeological
characterization and monitoring
Geotechnical applications of
geophysical methods
Measurement of gravity on land and
moving platforms
Pre-processing, displaying and
enhancing gravity data
Interpretation, modelling and
examples

Applications of gravity surveying
and examples
Slope stability assessments
Archaeological surveys
Voids and karstic features
Soil characterization
Contamination assessment
