

CALL FOR PAPERS

ICSSB 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSB 2021 : International Conference on Soil Science and Biodiversity is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soil Science and Biodiversity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Applied soil ecology
Soil organisms and biology
Soil processes, structures and fertility
Agricultural productivity and nutrient cycling
Biotechnological control of soil-inhabiting pests, diseases and weeds
Soil science: soil and ecology
Soil ecology and climate change

Primary production processes in soils: roots and rhizosphere associates
Secondary production processes
Decomposition and nutrient cycling
Soil foodwebs
Soil biodiversity and aboveground-belowground linkages
Future developments in soil ecology
Laboratory and field exercises in soil ecology
