

CALL FOR PAPERS

ICTBTSAEV 2021
Apr 29-30, 2021
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTBTSAEV 2021 : International Conference on Travel Behavior and Transportation Systems Analysis for Electric Vehicles is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Travel Behavior and Transportation Systems Analysis for Electric Vehicles. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Impacts of wired and wireless charging on traffic network flows
Electric vehicle users' travel behavior analysis based on real-world travel data
Impacts of stochastic charging demands on traffic flows and travel demands
Impact of electric vehicle users' charging behavior on power grids
Stochastic transportation network analysis with electric vehicle flows

Electric vehicles market penetration analysis and forecasting
Energy use and economic analysis of electric vehicles with advances in charging and battery technologies
Transportation systems planning considering the use of electric bicycles
Electric connected and autonomous vehicles
Electric car and bicycle sharing systems
