

# CALL FOR PAPERS

**ICAEPE 2021**  
**Apr 15-16, 2021**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAEPE 2021 : International Conference on Advances in Electric Power Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Electric Power Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrical Power Engineering  
Restructuring of the electricity industry and transnational networks  
Planning and operation of power systems under market conditions  
System services in deregulated markets  
Integration of distributed generation in the main grids  
Smart Grids  
Power system dynamics, stability and control  
Cascade faults and blackouts  
Electromagnetic compatibility/Power quality  
Lightning and electromagnetic transients

Diagnostics and reliability  
Power system protection  
Power system insulation  
Power electronics  
Renewable energy sources and storage devices  
Power system instrumentation, measurements and automation  
Electric devices  
Nuclear Energy Safe Utilization  
Nuclear Spent Fuel Management
