

# CALL FOR PAPERS

**ICSEME 2021**  
**Apr 19-20, 2021**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEME 2021 : International Conference on Sustainable Energy in Marine Environment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Energy in Marine Environment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Conversion of the wave energy  
Conversion of the tidal energy  
Offshore wind  
Floating platforms  
Hybrid concepts  
Modeling waves, tides, and offshore wind

Numerical modelling of marine energy converters  
Physical modelling of marine energy converters  
Arrays modelling  
Risk and reliability assessment in marine energy extraction  
Environmental impact of marine energy extraction  
LCOE dynamics in marine energy
