

CALL FOR PAPERS

ICACC 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACC 2021 : International Conference on Agroengineering and Climate Change is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Agroengineering and Climate Change. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Agroengineering

Agricultural mechanization and automation

Agriculture processing

Animal and plant environment

Aquacultural engineering

Bioinformation system

Bioprocess and environment

Biosystems technology

Biotechnology and bioengineering for agriculture and biosystems

Drying technology

Farm structure

Fermentation technology

Food and agricultural waste management

Food processing

Food security and safety

Microfluidics for food, agriculture and biosystems

Packaging engineering

Particle and powder technology

Postharvest engineering and technology

Precision farming and AgriGIS

Process control and integration

Process modelling and simulation

Safety and health in agriculture

Soil and water engineering

Veterinary medicine
