

CALL FOR PAPERS

ICAFDM 2021
May 13-14, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAFDM 2021 : International Conference on Advances in Forest Disease Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Forest Disease Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Forest disease management	Impact of adverse environmental conditions on trees
Forest pest management	Forest ecosystems
Integrated pest management in tropical forestry	Effects of air pollution of forest health
Biological control: principles and applications	The impacts of climate change impacts on forests
Forestry pest and disease management	Forest health management
Epidemiology of forest diseases	Forest pathological problems and their sources
Forest diseases caused by viruses	Abiotic factors and biotic factors affecting forest health
Forest diseases caused by prokaryotes	Parasitic flowering plants
Forest diseases caused by higher parasitic plants	Hazard trees
Pine wilt disease and other nematode diseases	Invasive species
Seed, seedling and nursery diseases	Signs and symptoms of forest diseases
Responding to diseases caused by exotic tree pathogens	Pathology detection and prevention
Forest pathology	Management and maintenance of forest diseases
