

CALL FOR PAPERS

ICGPAP 2021
May 24-25, 2021
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPAP 2021 : International Conference on Geocoding Process and Application Programming is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geocoding Process and Application Programming. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

| | |
|------------------------------|--|
| Geocoding | Customer data management |
| Geocoding process | Distributed geocoding applications |
| Input data | Digital compilation and database design |
| Classification of input data | Variations of geocoding |
| Relative input data | Intersection matching |
| Absolute input data | Zip code geocoding |
| Processing of input data | Reverse geocoding |
| Address interpolation | Geocoding apps |
| Complicating factors | Geocoding services web application programming |
| Other techniques | Required parameters |
| Address data analysis | Optional parameters |
