

CALL FOR PAPERS

ICSEM 2021
May 06-07, 2021
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEM 2021 : International Conference on Space Electronics and Microelectronics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Space Electronics and Microelectronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Space electronics and telemetry
Electronic engineering with space systems
Electronics for space systems
Design considerations for space electronics
Materials for space electronics
Space dynamics and missions
Space system design
Advanced guidance, navigation and control
Launch vehicles and propulsion
Antennas and propagation
Fundamentals of mobile communications
Principles of telecommunication and packet networks
Space robotics and autonomy

Satellite communications fundamentals
Satellite remote sensing
Radio frequency systems and circuit design
Space avionics
Advanced signal processing
Advanced mobile communications systems
Microwave engineering
Advanced satellite communication techniques
Spacecraft structures and mechanisms
Automatic control engineering
Space environment and protection
Advanced packaging for military and space
SIP 2.5- 3D and wafer level packaging WLP
