

CALL FOR PAPERS

ICSLCE 2021
May 06-07, 2021
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSLCE 2021 : International Conference on Sustainable Life-Cycle Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Life-Cycle Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Life-cycle engineering
Engineering activities in product life-cycle
Life-cycle engineering for sustainability
Sustainable design and manufacturing principles
Business and social outcomes of sustainable design
New life cycle modeling methods and assessment
Practices for effective sustainable design and manufacturing education

Methods for merging industrial value creation towards sustainability
Sustainability of industry 4.0 and IoT-enabled socio-technical systems
Novel metrics for sustainability explicitly outlining metric construction and assessment
Information sharing platforms for sustainability
Innovative design of sustainable systems
Case studies of sustainable design and manufacturing in practice
Emerging computing technologies and architectures for sustainability
