

CALL FOR PAPERS

ICCEIMM 2021
May 24-25, 2021
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEIMM 2021 : International Conference on Civil Engineering Infrastructure Maintenance and Management is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Engineering Infrastructure Maintenance and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering infrastructure maintenance

Maintenance and operation of infrastructure systems

Condition assessment and rehabilitation of civil infrastructure

Strengthening and rehabilitation of civil infrastructures

Deterioration of construction materials

Evaluation, non-destructive testing and rehabilitation of existing structures

Properties and applications of repair materials

Seismic retrofit of bridges

Analysis and design of structural members

Advanced infrastructure management

Strengthening and retrofitting of concrete structures

Repair and rehabilitation of concrete structures

Structural performance assessment and monitoring

Condition assessment and remedial action on steel structures

Structural concrete properties and practice

Structural dynamics with applications

Bridge management and maintenance
