

CALL FOR PAPERS

ICICSCS 2021
May 24-25, 2021
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICSCS 2021 : International Conference on Intelligent Control Systems and Computer Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Control Systems and Computer Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent control
Intelligent control architectures
and methods
Next generation intelligent control
architectures and methods
Multiagent based planning, control
and intelligence
Distributed/decentralized
intelligent control
Neural networks, fuzzy logic and
genetic algorithms
Swarm intelligence, learning and
control
Intelligent control of networked
dynamic systems
Intelligent control of wireless ad
hoc and sensor networks
Embedded intelligent control
Biological learning control
systems
Machine learning
Hybrid dynamical systems control,
pattern discovery

Distributed or decentralized
control methods
Probabilistic approaches,
knowledge-based sensor fusion
Distributed and embedded systems,
large scale systems
AI and expert systems, distributed
intelligence
Foundations of intelligent control
Intelligent control techniques
Intelligence and intelligent
control
Intelligent control systems
Characteristics of intelligent
control systems
Applications
Fuzzy control
Fuzzy control design
Design concerns
