

# CALL FOR PAPERS

**ICEMMM 2021**  
**May 17-18, 2021**  
**Sydney, Australia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEMMM 2021 : International Conference on Energetic Materials and Molecular Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energetic Materials and Molecular Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energetic materials  
Explosives and propellants  
Low sensitivity energetic materials  
Ionic energetic materials  
Nanostructured energetic materials  
Energetic materials synthesis  
Energetic materials design

Molecular modeling of energetic materials  
Structure and properties of energetic materials  
Structural investigation of energetic materials  
Computer-aided design of monopropellants  
Polycyclic amine chemistry  
Methods for preparing energetic nitro-compounds  
Applications of energetic materials
