

CALL FOR PAPERS

ICNFPTFQ 2021
May 17-18, 2021
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNFPTFQ 2021 : International Conference on New Food Processing Technologies and Food Quality is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of New Food Processing Technologies and Food Quality. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

New food processing technologies and food safety
New and emerging technologies for foods and food safety
Process-structure-function relationships at macro-, micro-, and nanoscale
Process control, process-packaging interactions
Resource efficient processes and sustainable processes

Kinetics and mechanisms of inactivation of microorganisms, enzymes, viruses, allergens, and toxins; nutrient retention, accessibility, and availability
Structural changes, texture, and rheology; and minimal processing
High hydrostatic pressure processing
New science and technology involved in food processing and quality assurance through information technology
