

CALL FOR PAPERS

ICCISA 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCISA 2021 : International Conference on Computer and Information Security Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer and Information Security Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Computer and information security
- Detecting system intrusions
- Intrusion detection
- Preventing system intrusions
- Fault tolerance and resilience in cloud computing environments
- Securing web applications, services and servers
- Internet security
- Wireless network security

- Wireless sensor network security
- Security management systems
- Policy-driven system management
- Privacy and access management
- Privacy-enhancing technologies
- Ethical hacking
- Security standards and policies
