

CALL FOR PAPERS

ICCTE 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCTE 2021 : International Conference on Chemical Thermodynamics and Energetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Thermodynamics and Energetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical thermodynamics
Chemical engineering
thermodynamics
Experimental equilibrium
thermodynamics
Energy, enthalpy and entropy
Systems in chemical thermodynamics
Laws of thermodynamics
Chemical reactions

Phase changes
The formation of solutions
Internal energy
Enthalpy
Entropy
Gibbs free energy
