

CALL FOR PAPERS

ICGRTC 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGRTC 2021 : International Conference on Groundwater Remediation, Treatment and Contamination is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Groundwater Remediation, Treatment and Contamination. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental engineering	Chemical precipitation
Groundwater remediation	Ion exchange
Techniques	Carbon absorption
Biological treatment technologies	Chemical oxidation
Bioaugmentation	Surfactant enhanced recovery
Bioventing	Permeable reactive barriers
Biosparging	Physical treatment technologies
Bioslurping	Pump and treat
Phytoremediation	Air sparging
Technologies	Dual phase vacuum extraction
Removal of pollution and	Monitoring-well oil skimming
contaminants	Environmental remediation
Permeable Reactive Barriers	Waste stabilization
Chemical treatment technologies
