

CALL FOR PAPERS

ICIFH 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIFH 2021 : International Conference on Information Fusion for Healthcare is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information Fusion for Healthcare. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|---|
| Analysis on fusion of big medical data | Improved algorithms for medical information fusion |
| Applications of multimodal learning in image and computer vision medical areas | Intelligent systems for medical information fusion |
| Combining multiple models for medical data | Joint feature learning |
| Combining multiple sources in medical data | Medical multi-sensor fusion |
| Cross modality learning | Multimodal metric learning for medical applications |
| Feature fusion for medical data | New models for multimodal medical data |
| Early and late fusion approaches | Transfer learning in multimodal medical data |
| Hierarchical models for medical information fusion | Deep learning with inputs from several data sources |
