

CALL FOR PAPERS

ICMSDMRPM 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSDMRPM 2021 : International Conference on Mathematical System Dynamics, Mathematical Representation and Programming Models is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mathematical System Dynamics, Mathematical Representation and Programming Models. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematical system dynamics
Mathematical programming models
Mathematical representation of
system dynamics models
Mathematical representation
Mathematical formulations of system
principles in system dynamics
Mathematical modeling of dynamic
systems

The general theory of causal
recursion
Simple applications
Complex applications
Causal recursion in population
dynamics and economic growth
theory
The self-steering and
self-regulation of human societies
as wholes
Non-measurable systems
