

CALL FOR PAPERS

ICRDIMCA 2021
May 27-28, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRDIMCA 2021 : International Conference on Recent Developments in Insilico Materials Chemistry and Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Developments in Insilico Materials Chemistry and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Insilico materials chemistry
Databases for chemical structure
representation
Molecular and homology modelling
Docking and screening

Target Prediction
Quantitative structure-activity
relationship models
ADME testing
Combinatorial chemistry
