

CALL FOR PAPERS

ICAPAGC 2021
Jun 10-11, 2021
Copenhagen, Denmark

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPAGC 2021 : International Conference on Airport Planning and Airport Gate Capacity is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Airport Planning and Airport Gate Capacity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Airport planning
Airport planning and management
Airplane characteristics for
airport planning
Airplane performance
Ground maneuvering
Terminal servicing
Jet engine wake and noise data
Pavement data
Airline network development
Airport gate capacity
Airport systems planning and
design
Civil engineering for airports

Planning, design and construction
of terminals and runways
Airports design and construction
Accessible airport facilities
Airport design: additional tools
and drawings
Airports gis and electronic airport
layout plan
Airport lighting
Airport pavement design and
construction
Airport airspace analysis
Airport construction standards
Airport design and engineering
standards
Airport and safety areas
International airports, domestic
airports, regional airports
