

# CALL FOR PAPERS

**ICCMCAF 2021**  
**Jun 14-15, 2021**  
**Montreal, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMCAF 2021 : International Conference on Conformal Mapping, Complex Analysis and Complex Functions is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Conformal Mapping, Complex Analysis and Complex Functions. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Conformal mapping  
Complex analysis and conformal mapping  
Complex functions  
Scale factors  
Riemannian geometry  
The extended complex plane and Riemann Sphere

Higher-dimensional Euclidean space  
Uses of conformal map  
Pseudo-Riemannian geometry  
Cauchy-Riemann Equations and Conformal mapping  
Conformal mappings of certain simply-connected domains  
Conformal mapping and its applications
