

# CALL FOR PAPERS

**ICCTGA 2021**  
**Jun 14-15, 2021**  
**Montreal, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCTGA 2021 : International Conference on Cybernetic Technology and Genetic Algorithms is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cybernetic Technology and Genetic Algorithms. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cybernetic technology  
Cybernetics  
Intelligent systems and robotics  
Innovative designs  
Advanced controls  
Enhanced perception and cybernetics  
Robust manipulation  
Fuzzy systems  
Neural networks  
Genetic algorithms  
Evolutionary computation  
Image processing  
Computer vision

Systems modeling and control  
Smart sensor networks  
Cyber-physical systems  
Regulation in biological systems  
The Marconian machine  
Regulation and control  
Transformation  
Repeated change  
The determinate machine  
Coupling systems  
Independence within a whole  
The very large system  
Stability
