

CALL FOR PAPERS

ICSERP 2021
Jun 14-15, 2021
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSERP 2021 : International Conference on Stream Ecosystems and Riparian Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Stream Ecosystems and Riparian Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Stream ecosystems
Groundwater and stream ecosystems
Methods in stream ecosystems
Riparian processes and interactions
Dynamics of wood
Stable isotopes in stream food webs
Ecosystem processes
Stream ecology
Biological, hydrological, and geomorphic connections in stream channels

Nutrient spiraling and transport in streams
Dissolved organic matter in stream ecosystems
Stream-lake interaction
Landscape and regional stream ecology
Global models of river biogeochemical functioning
Human impacts on stream hydrology and water quality
Ecological effects of water reservoirs
Energy sources and energy processing
