

CALL FOR PAPERS

ICUSM 2021
Jun 14-15, 2021
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUSM 2021 : International Conference on Urban Simulation and Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Urban Simulation and Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Urban simulation	Calibration and prediction
Urban simulation and design	Modelling types and styles
Digital urban modeling	Land use transportation models
Methods, models and planning applications	Spatial interaction
Applications	Discrete choice theory
Architecture	Integrated comprehensive models
Engagement	Lowry models
Land use, transportation, and environmental planning	Contemporary urban land use models
Urban simulation models	Climate change and energy predictions in models
Model - building process	Modelling urban morphology
Data analysis
