

CALL FOR PAPERS

ICCSM 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSM 2021 : International Conference on Cartography and Statistical Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cartography and Statistical Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cartography
Fundamentals of general cartography
Two dimensional diagrams
Three dimensional diagrams
Distributional map
Statistical methods
Spatial data
Technological changes
Deconstruction
Map types
Gis cartography
General vs. Thematic cartography
Topographic vs. Topological

Map design
Map purpose and selection of information
Naming conventions
Map symbology
Map key or legend
Examples of point symbols
Map generalization
Map projections
Cartographic errors
Basic concepts of cartography and geographic information
Representation and communication
The power of maps
Abstraction and reliability
