

CALL FOR PAPERS

ICERST 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICERST 2021 : International Conference on Environmental Remediation Systems and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Remediation Systems and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental remediation
Environmental engineering
Removal of pollution and
contaminants
Remediation policies
Remediation standards
Site assessment
Funding remediation
Mapping remediation
Waste stabilization
Technologies
Remediation systems
Systems analysis
Applications for environmental
remediation

Thermal desorption
Design and construction
Environmental risk assessment
Waste management
Excavation or dredging
Lead recovery and soil excavation
Surfactant enhanced aquifer
remediation (SEAR)
Pump and treat
Solidification and stabilization
In situ oxidation
Soil vapor extraction
Nanoremediation
Bioremediation
