

CALL FOR PAPERS

ICGPAP 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPAP 2021 : International Conference on Geocoding Process and Application Programming is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geocoding Process and Application Programming. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Geocoding
- Geocoding process
- Input data
- Classification of input data
- Relative input data
- Absolute input data
- Processing of input data
- Address interpolation
- Complicating factors
- Other techniques
- Address data analysis

- Customer data management
- Distributed geocoding applications
- Digital compilation and database design
- Variations of geocoding
- Intersection matching
- Zip code geocoding
- Reverse geocoding
- Geocoding apps
- Geocoding services web application programming
- Required parameters
- Optional parameters
