

CALL FOR PAPERS

ICMBMB 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMBMB 2021 : International Conference on Microbial Biotechnology and Molecular Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Microbial Biotechnology and Molecular Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Microbial biotechnology
New approaches to microbial biotechnology
Microbial biotechnology for production of chemicals and pharmaceuticals
Recent advances in biochemical techniques
Microbial physiology, metabolism and gene expression
Biocatalysts, synthetic biology and biotechnology
Biotechnological production of new bioactive molecules, biomaterials, biopharmaceuticals, and biofuels
New imaging techniques and biosensors
New biotechnological approaches in genomics, proteomics and metabolomics
Metabolic Engineering, biomolecular engineering and Nanobiotechnology
Structure of microbes, prokaryotes and eukaryotes
Microbial enzymes
Bacterial transformation

Electroporation
Cloning and expression techniques
Fusion proteins
Microbial proteins
Food products
Energy production in bacteria
Therapeutic proteins
Field applications of recombinant microorganisms
Using microbes against other microbes
Vaccines
Microbial genomes
Viral genomes
Microbial diagnostics
