

# CALL FOR PAPERS

**ICNDEW 2021**  
**Jun 03-04, 2021**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNDEW 2021 : International Conference on Natural Disasters and Extreme Weather is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Natural Disasters and Extreme Weather. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |  |                        |
|--|------------------------|
| Natural Hazards                              | Volcanic eruption      |
| Earth System                                 | Meteorological hazards |
| Geological sequestration of greenhouse gases | Blizzard               |
| Geologic processes affecting Earth's climate | Drought                |
| Climate change and global warming            | Hailstorm              |
| Geological hazards                           | Heat wave              |
| Contamination                                | Cyclonic storm         |
| Avalanche                                    | Ice storm              |
| Earthquake                                   | Tornado                |
| Coastal erosion                              | Climate change         |
| Lahar  | Geomagnetic storm      |
| Landslide                                    | Water spout            |
| Sinkholes                                    | Multi-hazard analysis  |
