

CALL FOR PAPERS

ICPCMPS 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPCMPS 2021 : International Conference on Protection and Control of Modern Power Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Protection and Control of Modern Power Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Modern power systems
Cyber security in modern power systems
Algorithms for modern power systems
Modern power system analysis and design
Comprehensive energy network
Smart grid technologies
Clean energy integration
Clean energy control and protection
Microgrid and distributed generation

Interactions between electric vehicles and power systems
Sustainable electric power technology
Flexible power transmission and distribution technology
Power electronics technology in power systems
Computational methods for power systems
Power system planning, control, operation and protection
Electricity market
Information and communication technologies in modern power systems
