

CALL FOR PAPERS

ICRATE 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRATE 2021 : International Conference on Recent Advances in Tsunami Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Tsunami Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Tsunami engineering for civil infrastructures
Performance-based tsunami engineering
Performance-based earthquake engineering
Tsunami interactions with the built environment
Architecture of tsunami-resistant buildings
Tsunami-resistant cities and urban architecture

Urban design and architecture for tsunami-resistance
Tsunami hazard and design of coastal structures
Tsunami-shoreline interaction
Tsunami run-up and interaction with structures
Tsunami warning system and instrumentation
Developing and constructing early warning systems for alert coastal residents
