

CALL FOR PAPERS

ICRMCE 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRMCE 2021 : International Conference on Recyclable Materials in Civil Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recyclable Materials in Civil Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Recyclable materials in sustainable civil engineering
Sustainability of construction materials
Sustainable materials, recycling and environment
Use of recycled and demolished materials in construction
Use of industrial by-products
Desulphurized waste residues in construction

Use of local materials
Rammed earth and similar products
Using novel materials as cement replacement
Cementless concrete materials
Production of chemical admixtures derived from agriculture waste for concrete and other applications
Use of waste food to produce materials for construction materials
