

CALL FOR PAPERS

ICSESEA 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSESEA 2021 : International Conference on Sustainable Energy Storage Engineering and Application is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Energy Storage Engineering and Application. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable energy storage and technologies

Sustainable materials for sustainable energy storage

Sustainable renewable energy storage

Sustainable electrical energy storage

Sustainable energy storage and renewable energy

Sustainable energy storage trends and opportunities

Strategic analysis of sustainable energy storage in countries

Sustainable energy storage and smart systems for energy security

Financial case studies for energy storage applications

Regulatory reform/policy

Commercial and industrial applications for energy storage

Aggregated distributed energy resources / virtual power plant

Business case for energy storage providing ancillary services

Energy storage for grid integration of renewable energy

Case studies for solar and storage installations

Microgrids and smart grids

Mining and remote area power solutions
