

# CALL FOR PAPERS

**ICSMP 2021**  
**Jun 03-04, 2021**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMP 2021 : International Conference on Soil Management and Practices is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soil Management and Practices. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |  |
|---|--|
| Agricultural engineering                                    | Rice cultivation   |
| Agricultural science  | Soil quality   |
| Agricultural infrastructure                                 | Biodiversity and productivity  |
| Soil management and conservation                            | Soil value   |
| Agricultural soil management practices                      | Soil compaction  |
| Protect soil and enhance its performance                    | Cover crops  |
| Production and emission of nitrous oxide (N <sub>2</sub> O) | Environmental impact assessments   |
| Management of soils   | Agricultural product processing  |
| Soil structure and function                                 | Agricultural machinery, equipment, processing technology, and structures |
| Maintain soil fertility                                     | Water reservoirs, warehouses and other structures                        |
| Restore soil fertility                                      | Pollution control at large farms   |
| Manure management   | Developing new forms of biofuels from non-food resources                 |
| Nutrient management   |  |
