

CALL FOR PAPERS

ICSMTC 2021
Jun 03-04, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMTC 2021 : International Conference on Software Metering and Trend Calculation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Metering and Trend Calculation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software metering

Active / passive software metering

Intellectual property metering

Tracking and maintaining software licenses

Real-time monitoring of applications

Fixed planning to allocate software usage

Planning for software metering

Configuring software metering

Software metering rules

Operations and maintenance for software metering

Security and privacy for software metering

Technical reference for software metering

Software metering and usage analysis

Planning and design

Data collation

Trend calculation

Data summarization

Software metering server

Software metering database server

Administration tools

Assigning roles

Setup and configuration

License balancing

Site management

Data collection

Security
