

# CALL FOR PAPERS

**ICNCMEA 2021**  
**Jun 10-11, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNCMEA 2021 : International Conference on Nanostructured Carbon Materials for Energy Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanostructured Carbon Materials for Energy Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

New methodology of the synthesis of nanostructured carbon materials such as carbon nanotubes, graphene, nanocarbon coatings, thin films, and assembled nanocomposites or architectures  
Synthesis and fabrication of novel nanostructured carbon materials for special functions of lubrication, catalytic reaction and wettability with surface energy control

Applications in coatings, energy storage and conversion, fuel cells, and catalysts  
Theoretical and fundamental study of new nanostructured carbon materials in lithium ion batteries and fuel cells
