

CALL FOR PAPERS

ICWET 2021
Jun 15-16, 2021
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWET 2021 : International Conference on Web Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Web Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Internet Engineering
Networking technologies in
developing regions
Emergency networks and dependable
infrastructures
Ad hoc and sensor networking and
applications
Wireless and mobile networks
Delay and disruption tolerant
networks
Autonomic and situated
communications
New networking paradigm and
architecture
Location management and
positioning
Internet measurement, analysis and
modelling
Peer-to-peer and overlay networks
Multimedia systems and
applications
Network operations and management

Web Engineering
Web application development
Collaborative Web application
development
Design models and methods
Programming models for Web
application development
Component-based Web Engineering
Web services-based applications
Service discovery and choreography
Infrastructure and models for
service delivery over the Web
Rich Internet Applications
Web architectures and application
frameworks
Web centric architectures for
enterprise computing
