

CALL FOR PAPERS

ICISPA 2021
Jul 22-23, 2021
Berlin, Germany

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICISPA 2021 : International Conference on Intelligent Signal Processing and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Signal Processing and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent signal processing	Wireless systems
Application of intelligent signal processing	Intelligent communication systems
Autonomous systems	Network protocols
Big data, robotics and machine	Multimedia and systems
Human interface	Speech processing and coding
Tactile internet	Video processing and coding
Wavelets and multirate signal processing	Video and multimedia technology and communications
Adaptive, non-linear signal processing	Audio/acoustic signal processing
Security signal processing	Signal processing
Communication systems	Digital filters
Radio propagation and channel modeling	VLSI
Communication theory, antenna and propagation	Analog and digital ICS for communications
Wideband communications	Low power design
