

CALL FOR PAPERS

ICBTM 2021
Jul 26-27, 2021
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBTM 2021 : International Conference on Biosensor Technologies and Microelectronics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biosensor Technologies and Microelectronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biosensor technologies
Biosensors and bioelectronics
Biosensing technology
Biophotonics
Security and sensing
Photonic sensor technologies
Nano-bio-optics
BioMEMS/NEMS
Advancement in nanotechnology

Bioinstrumentation
Environmental biosensors
Biosensors for imaging
DNA chips and nucleic acid sensors
Sensor networks and data
communications
Nanobiosensors
Nanobioelectronics
Biosensing technology
Application of biosensors in drug
delivery and clinical chemistry
