

CALL FOR PAPERS

ICCCMEA 2021
Jul 12-13, 2021
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCMEA 2021 : International Conference on Computational Chemistry, Methods and Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Chemistry, Methods and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical engineering
Computational chemistry
Chemical problems
Fields of application
Accuracy
Methods
Ab initio methods
Density functional methods
Semi-empirical and empirical methods
Molecular mechanics
Methods for solids
Chemical dynamics
Molecular dynamics

Interpreting molecular wave functions
Software packages
New concepts and innovations
Safety and hazard developments
Recent progress
Chemical reaction engineering
Plant design and construction
Process design and analysis
Transport phenomena
Applications And Practice
Convert chemicals, raw materials, living cells, microorganisms and energy
Useful forms and products
