

# CALL FOR PAPERS

**ICCSIP 2021**  
**Jul 12-13, 2021**  
**Ottawa, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSIP 2021 : International Conference on Communication Software and Information Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Communication Software and Information Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Communication software	Software for distributed systems and applications
Communication software, design, development and construction	Smart grid and cloud computing services
Software engineering for developing new communication techniques	Peer-to-peer technologies for communication services
Information systems and engineering for communication systems	Terminal emulators
Communication and software engineering	File transfer programs
Ubiquitous computing services and applications	Chat and instant messaging programs
Networked autonomous systems	Special transfer modes and methods
Communications software in vehicular communications	Software systems for real-time communication
Web services and distributed software technology	E-mail, video chat and messages and web conferencing
