

# CALL FOR PAPERS

**ICECE 2021**  
**Jul 12-13, 2021**  
**Ottawa, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECE 2021 : International Conference on Eutrophication in Coastal Ecosystems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Eutrophication in Coastal Ecosystems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine coastal eutrophication  
Processes controlling eutrophication  
Impact of marine coastal eutrophication on humans and economic activities  
Marine coastal eutrophication modeling, simulation and analysis  
Global change and eutrophication of coastal waters  
Causes, effects and solutions to eutrophication  
Harmful algal blooms and eutrophication  
Primary and secondary effects of marine coastal eutrophication  
Phytoplankton  
Submerged aquatic vegetation

Oxygen depletion  
Invertebrate benthic fauna  
Sources of high nutrient runoff  
Point sources  
Nonpoint sources  
Soil retention  
Runoff to surface water and leaching to groundwater  
Atmospheric deposition  
Prevention and reversal of eutrophication
